

**Amendment to the Abstract:**

The Abstract has been amended. A revised Abstract is attached.

**ABSTRACT**

~~A remote controller easy to manipulate and a device to be controlled by the remote controller are provided. The remote controller includes: a switching means~~switch ~~for selecting one of a plurality of options in one dimension out of control items laid out in a plurality of dimensions, an item selecting means~~selector ~~for selecting one of a plurality of options in another dimension out of the control items laid out in the plurality of dimensions. The remote controller transmits a remote control code in accordance with an output of the switching means~~switch ~~and an output of the item selecting means~~selector~~. The device to be controlled by the remote controller is provided with a displaying means~~display ~~for showing the control items in accordance with a signal from the remote controller. Every time the first remote control code is transmitted, the displaying means~~display ~~displays control items selectable by the item selecting means for a certain period of time.~~

Respectfully submitted,
